Parent information & questionnaire - distance learning

Dear Parents,

We are currently looking forward to working with your children in face-to-face classes. We are preparing for the eventuality that individual children, classes or the whole school need to take to distance learning. In that case, distance teaching shall be equivalent to face-to-face teaching (handout on linking face-to-face and distance teaching to promote learning, 08.2020, Ministry for Schools and Further Education of the State of North Rhine-Westphalia). It includes the performance evaluation of your child. For this, your child needs a digital work device.

Henceforth, we would like to know what digital possibilities your child has. Please answer the questionnaire so that we, in cooperation with the school authorities, can enable all children to have optimal distance learning. You will receive the questionnaire printed out in your child's postal folder. We request you to kindly return the completed form to the class management by Thursday, October 29th, 2020.

For distance learning we will, among other things, use our homepage & Logineo (home page), possibly also "padlets" that are already known at our school.

We are currently developing a concept for distance learning and a substitute concept. We will do our best to offer face-to-face lessons to your child as long as possible. However, we must all be aware that a representation concept has limits. If quarantine measures or illnesses affect our personnel situation, distance learning may take place at very short notice and your child shall then study at home. We would like to ask you to prepare yourself for this case. We know what that means to you.

We hope that the general situation will develop positively and that, together we will be able to overcome the challenges successfully.

With kind regards

Doris Hartlep & Peter Theobald
Schulleiterin & Stellv. Schulleiter
